Subject: Information on Regulation (EU) 2019/1021 – POP Regulation

Dear Ladies and Gentlemen,

The "Regulation (EU) 2019/1021 of the European Parliament and of the Council of 20 June 2019 on persistent organic pollutants" (POP Regulation) prohibits the manufacturing, placing on the market, and use of persistent organic pollutants.

The SSI Schäfer Fritz Schäfer GmbH hereby confirms that no substances according to Annex I – Prohibited Substances – and Annex II – Substances Subject to Restrictions – are used for the manufacturing of our products or the associated assembly work, if such work is required.

As part of the supply chain, we are also in close contact with our suppliers regarding their procedures for handling POP substances. According to the information available to us, the products of our suppliers and sub-suppliers do not contain any POP substances according to Annex I or II of the regulation.

As a result, the products we deliver to your company do not contain any POP substances to our knowledge according to the current lists of substances in Annex I and II. If you have further questions regarding the POP regulation, please contact us in writing at **ZBV-Sicherheit@ssi-schaefer.de** or by telephone on **+49 2735 70-555**.

Please understand that we cannot fill out any special questionnaires due to the high number of requests we receive. We hope, however, that this letter contains the information you need and would like to thank you for your trust in us.

Best regards

SSI SCHÄFER PLASTICS GMBH
