

Smooth distribution, retrieval, and changeover? It's possible. With SSI SCHAEFER Plastics.

Everything from a single source. Containers.
Concept. Implementation.

THE CHALLENGE

Many local authorities and waste management companies face the same challenge when distributing, collecting or recharging recycling bins: **little time, high logistical complexity and a lack of resources such as staff, vehicles or planning solutions.** Without clear processes, there is a risk of delays, additional work and dissatisfaction among citizens.

This is exactly where we come in - with a comprehensive service that takes care of all the planning, implementation and documentation for you.

THE SOLUTION

From production to the provision or collection of the garbage can - We take over the complete organization and implementation for you.

Rely on an experienced team that thinks processes through instead of just implementing them. We offer everything you need for successful container scheduling - including high-performance software.

Start your project for
2025 now & benefit
from DISPONDO!

Your ADVANTAGES

Containers from our own production

Made in Germany - high availability & certified quality.

Advice from experts

We analyze your initial situation and develop the optimal concept.

Sophisticated planning & implementation

Container mapping, geo-fencing, routing, communication - all integrated.

DISPONDO included

Our management software provides an overview, traceability and digital control.

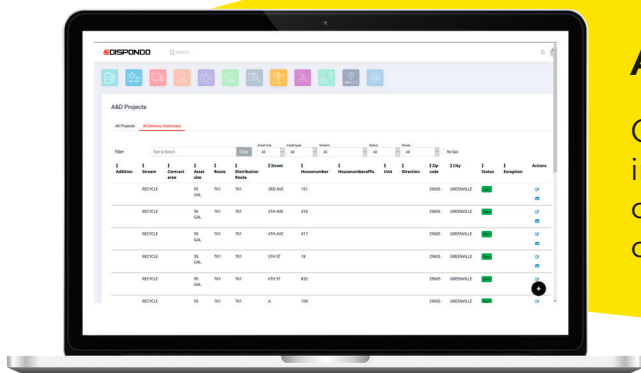

SSI SCHAEFER

Well thought out. Planned. Precisely.
