SSI SCHÄFER

The best ideas come from working closely with customers.

The **GMT Duron 1,100 L** was developed in collaboration with waste management companies. A **variety of perspectives** were taken into account – from management to the waste collection operatives on the job every day. The result is a well-designed large-capacity container that meets the **demands of daily operation**.

Great operational safety

- **optimised, rounded mounting pins** reduce the risk of damage when the container is fitted
- patent-pending **double ribs** increase dimensional stability and ensure a secure fit during emptying
- patent-pending **predetermined breaking point** on the lid bolt prevents damage to the hinge if the lid tilts during emptying

Easy to use

- **tapered corner radii** make destacking easier
- **additional ergonomic lid** handles centered on the narrow sides improve maneuverability
- the **lid-to-lid system** makes filling easier

Lower life-cycle costs

- **design-integrated protective features** reduce the risk of damage
- **less damage** means **less repair work** and less downtime
- **designed for a long service life**: a holistic approach to materials, production and design

Lid embossing is also possible.

Production in accordance with Blue Angel certification is possible

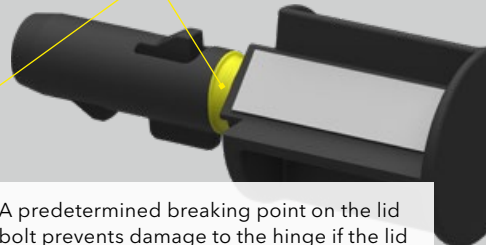

Further features

- made from high-density polyethylene (HDPE)
- long service life
- UV-stabilised
- specially designed comb strip and front section for extreme loads
- Swivel castors with plastic rims and wheel stops
- Swivel castors with steel rims and optional central locking
- manufactured in accordance with DIN EN 840 - 1, 5 and 6
- RAL certification pending
- Containers available with mounting pins fitted, supplied separately or without mounting pins.
- wide range of accessories available (including feed hoppers, locks, harnesses, foot-operated lid openers)

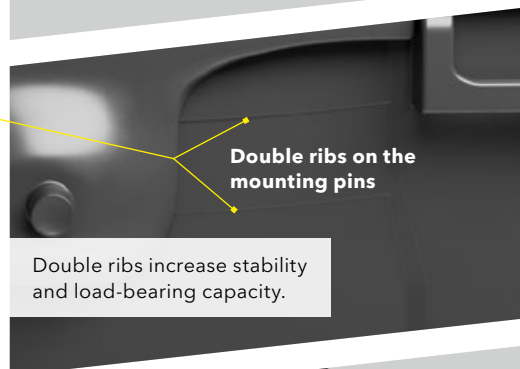

Improved opening and handling thanks to additional handles positioned centrally on the sides

Predetermined breaking point on the lid bolt

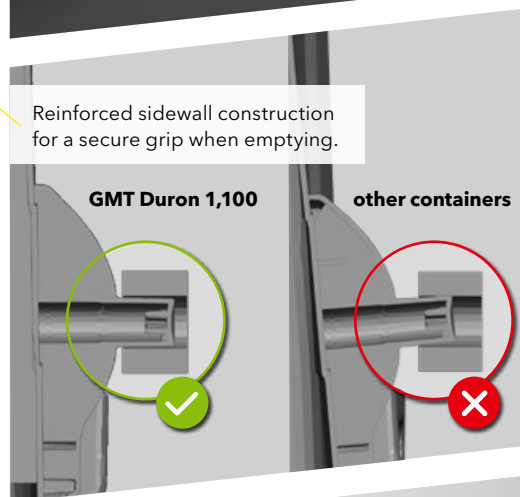

A predetermined breaking point on the lid bolt prevents damage to the hinge if the lid becomes jammed during emptying.

Double ribs on the mounting pins

Double ribs increase stability and load-bearing capacity.

Reinforced sidewall construction for a secure grip when emptying.

The small lid opens across the entire width of the container, which is over 280 mm deep.

Technical specifications

Width mm (W)	1.370 max.
Height mm (H)	1.352 max.
Depth mm (D)	1.073 max.
Capacity (litres)	1.100 ± 5 %
Cone height mm (CH)	1.020
Baffle height mm (BH)	1.229

All dimensions given are nominal dimensions in accordance with DIN EN 840; colour variations may occur.

Six reasons why choosing SSI SCHÄFER Plastics is the right decision

■ Security

As a financially independent family-run business, SSI SCHÄFER Plastics takes a long-term view, and you can rest assured that our team of experts will be there for you today, tomorrow and beyond.

■ Cost-effectiveness

SSI SCHÄFER Plastics' solutions are scalable and grow in line with your requirements. The modular design of the solutions allows you to upgrade at any time or modernise your processes step by step.

■ Quality

As an expert in the recycling industry with in-house development and manufacturing capabilities, SSI SCHÄFER Plastics provides you with a wide range of high-quality solutions from a single source. Targeted quality management in accordance with recognised standards ensures that our products are highly reliable and durable – a fact also confirmed by independent testing bodies.

■ Reliability

Through our in-house Customer Service & Support team, SSI SCHÄFER Plastics ensures the smooth operation of your systems and processes in the long term, both during and after implementation.

■ Know-how

For decades, SSI SCHÄFER Plastics has played a pioneering role in the development of innovative waste management systems, setting new standards in the waste management industry through innovation and high quality.

■ Digitalisation

SSI SCHÄFER Plastics' solutions are always state-of-the-art. Our digital experts design comprehensive, tailor-made system solutions and modular concepts that integrate seamlessly into your existing structures and generate direct added value.
